

**Testimony by Andrew A. Beveridge, Ph.D. at LATFOR Hearing  
Smithtown, NY 11787, February 9, 2012  
As Amended February 15, 2012**

My name is Andrew A. Beveridge. I live in Yonkers and I am a Professor of Sociology at Queens College and the Graduate Center of CUNY. I am also the President and Co-Founder of Social Explorer, which supplies data to a large range of clients through a web-based service. Since the early 1990s, I have been involved in redistricting in New York State. In 1993, I assisted in drawing the plan for the Yonkers City Council. In 2003, I assisted with a new plan for the Yonkers City Council. This year I helped draw the plans for the Westchester County Board of Legislature and the New Rochelle City Council.

I also have been involved in litigation regarding redistricting. I was an expert witness in the successful suit against the Town of Hempstead, which resulted in drawing districts for the first time. I was an expert in the challenge to the current State Senate Lines. I was an expert witness in the successful litigation against New Rochelle in 2003-2004 and against the Village of Port Chester in 2009. I also testified in a case involving the Suffolk County Board of Legislators, and assisted in the redistricting of Nassau County in 2003. I also was involved in the Federal Court challenge to the proposed district lines in Nassau County, now suspended by a State Court Ruling.

Today I rise to analyze from a Voting Rights perspective the proposed State Senate Plan. I have compared that plan to the Current Lines adopted in 2002 but using current data. I also compare that plan to that proposed by Common Cause, by the so-called Unity Group and an another plan crafted by Todd Breitbart, who gained expert in redistricting working for the State Senate minority before he retired. At the White Plains hearing, I called upon LATFOR to use the Citizen of Voting Age Population (CVAP), rather than Voting Age Population (VAP) for all of their calculations with respect to the Voting Rights Act for this round of redistricting. Despite the fact

that using Voting Age Population plainly includes many people that cannot legally vote, as many as two-thirds in some cases, LATFOR and majorities of both houses have apparently continued to use VAP, even though CVAP was adopted in the last round of litigation about the State Senate Plan, as well as by Federal Courts reviewing plans for New Rochelle, Port Chester, and Suffolk County.

**Since my testimony (indeed that very afternoon) the Census Bureau released on the redistricting website CVAP data based upon 2006-2010 ACS. I have amended my statement to reflect the new data, as well as an updated plan presented by Todd Breitbart.**

When one uses a standard based upon CVAP, where a minority group is in the majority (often considered the minimal standard for showing that a district has an effective majority of a minority group) the results are very telling.

First, with respect to Non-Hispanic African American or Black population all five plans analyzed create seven districts with an effective majority. However, when one examines the number of Hispanics districts with an effective majority the plans vary greatly.

The proposed plan has two Hispanic districts, the current plan has two Hispanic districts, the Common Cause plan has four Hispanic districts (three in the Bronx, one in Brooklyn), the unity plan has three Hispanic districts in the Bronx, and the Breitbart plan has six Hispanic Districts. Plainly this demonstrates that an array of plans exist that go a much further to protect Hispanic minority Voting Rights than that in the proposed Senate plan. It is now clear, why they have chosen to confuse matters by not using the appropriate standard.

When one looks at the potential of districts with a majority of African Americans combined with Hispanics, the proposed Senate plan has five such districts, as does the current plan. The Common Cause plan creates three such districts, one of which is in Nassau. The Breitbart plan creates three such districts, including one in Nassau. I understand that there has been an assertion that there is no evidence of coalition between Hispanics and African Americans in Nassau County.

However, based upon evidence developed during the litigation regarding the Nassau Board of Legislators it is plain that blacks and Latinos who live near one another vote together in Nassau County. The same cannot be said for New York City. A recent turnover in the Nassau Board reinforces this fact.

It is also the case, that even given the fact that the State Senate plan increases the number of seats to 63, it does not increase the minority representation in any way. Indeed, the other 63 seat plans, as well as the Breitbart 62 seat plan create more Hispanic seats than does the proposed Senate plan.

In sum the current proposal does much to diminish the voting power of Hispanics, as well as the rights of minorities in general. The proposed Senate plan, in fact, cracks Hispanic areas to diminish the power of Hispanic voters. In short, they are depriving Hispanics of their rights, and in some cases pitting blacks and Hispanics against one another in New York City Districts. At the same time, in areas where there is evidence of cross group coalescence they crack both African American and Hispanics.

I fully expect that the plan that eventually goes into effect will not engage in these blatant denials of rights. Instead, the plan that eventually comes into effect will be the result of a veto by Governor and/or a Court proceeding that will not trample on the voting rights of minorities.

The attached charts have the following three panels:

- 1) An analysis of deviations in total population, as well as an analysis based upon CVAP using Department of Justice created tabulation from the American Community Survey (ACS) 2006-2010. The categories used are based upon those provided by the Department of Justice (DOJ).

- 2) . An analysis based upon Voting Age Population based upon the 2010 Census and tabulated using the recommended DOJ categories.

3) An analysis based upon Total Population based upon the 2010 Census and tabulated using the recommended DOJ categories.
